California OES Weekly Weather Threat Briefing

September 27, 2018
10:00 AM PDT

Day 1 Primary Hazards: Moderate heat risk for those sensitive to heat

National Weather Service
Western Region Headquarters
Regional Operations Center
Salt Lake City, UT

Prepared by: Travis Wilson
801-524-7907

Key Points

September 27, 2018 - October 3, 2018

Wednesday – Friday

- Moderate heat risk (Orange) for sensitive groups across California.
- Very dry conditions thus a slight fire weather threat into Fri.

Saturday - Sunday

- Fire Weather Watch along the northern and central CA/NV border from 12p Sat until 8p Sat
- Showers across extreme northwestern CA on Saturday

Monday - Tuesday

- **Moisture from remnant Hurricane Rosa may bring heavy rainfall to extreme southern CA Monday or Tuesday.**
- Although confidence is low, rainfall may affect West, Pasqual, Cranston and Holy burn scars.
- Forecast may change significantly as the event nears
